CONTENT

S.No	Content	Date	Page No:
1	Program to develop the android mobile application which consist of GUI components for Login Page creation.		
2	Program to display the content of EditText in TextView on button click.		
3	Program to design a Login Form with username and password using LinearLayout and toast valid credentials		
4	Program to implementing basic arithmetic operations of a simple calculator		
5	Program to complement validations on various UI controls		
6	Program to design a registration activity and store registration details in local memory of phone using Intents and SharedPreferences		
7	Program to design a simple Calculator using GridLayout and Cascaded LinearLayout		
8	Program to create a Facebook page using RelativeLayout; set properties using .xml file		
9	Program to develop an application that toggles image using FrameLayout		
10	Program to implement Adapters and perform exception handling		
11	Program to implement Intent to navigate between multiple activities (Explicit Intent)		
12	Program to develop an application that works with Implicit intents		
13	Program to implement Options Menu to navigate to activities		
14	Program to develop an application that uses ArrayAdapter with ListView		
15	Program to develop an application that use GridView with images and display Alert box on selection		
16	Program to develop an application that implements Spinner component and perform event handling		
17	Program to apply themes via code from manifest file		
18	Program to develop application using Fragments		

19	Program to implement Navigation drawer		
20	Program to implement activity life cycle		
21	Program to implement various SQLite operations : (INSERT, UPDATE ,DELETE ,SELECT)		

Program no:1
